

An open invitation to physics labs – Chance to test spiritual energy

I invite physics labs anywhere in the world to test the existence of energy beyond physical energy i.e what I call as spiritual energy

My claims are as follows:

1. Spiritual energy is real just like physical energy
2. In fact spiritual energy is even more real than physical energy because it can spiritualize anything physical i.e., make it vanish from space and time
3. Spiritual energy is harmonizing in nature. It integrates unlike physical energy which acts by force and is disintegrating in influence.

What I suggest is that the lab can create powerful physical energy which I can show will considerably start to decrease in force and even vanish given sufficient time when it is under the influence of spiritual energy. This can be shown to prove the above three claims I have made.

Most significantly it can reveal to the world and to science a new type of reality itself that is beneath space and time.

Physics labs just shouldn't miss the opportunity.
