

# Spiritual Power

I am one of the lucky few blessed with spiritual power. By that I mean I can generate spiritual energy. Spiritual energy is generated from the mind drawing from the power of soul, It is more real than physical energy.

Spiritual energy has the property of spiritualizing anything that comes under its influence. That means it can take away the force in any energy under its influence. It does so by interconnecting the energy with respect to space and time and the energy becomes constant with respect to space and time and so becomes spiritual.

I figured out I can generate spiritual energy to any extent and endlessly. It can cure diseases such as cancer and solve mental and many other problems. So the power and intelligence of spiritual energy is beyond the scope of even a nation.

I would like to use my power for the benefit of others and for the society in whatever way possible. I have initiated a number of projects in this regards. Kindly go through the website and take a look at the initiatives. Do not hesitate to contact me for any help.
